I love writing software that people use. Anytime I spot someone using an app I contributed to, or when I get an email from someone who uses a library I made, I get a big grin on my face.

Work History

Senior Mobile Developer

MindSea Development Inc., Halifax, Nova Scotia

March 2015 - Present

- Led development on 7 iOS projects with various teams of 1-4 developers, resulting in 23 apps shipped to the App Store used by hundreds of thousands of people each month.
- Wrote apps in Swift and Objective-C, and a shared library that's a mix of both.

Programmer

Trilogy Software Inc., Calgary, Alberta

November 2011 - October 2012

- Developed features for DoxCycle, a PDF-based tax document management application for Windows; and TaxCycle, a Canadian tax preparation suite for Windows.

Programmer

Gruber Lab, Canadian Centre for Behavioural Neuroscience, Lethbridge, Alberta

October 2010 - June 2011

- Assembled an apparatus using commodity parts to conduct dynamic clamp experiments in neurons.

Side Projects

HTMLReader

June 2013 - Present

- A WHATWG-compliant (i.e. "like a browser") HTML parser written in Objective-C. The code is freely available at <https://github.com/nolanw/HTMLReader>, and I understand it's used in many shipping apps.

Education

Bachelor of Computer Science (Honours)

University of Waterloo

Fall 2006 - Spring 2010

Non-Technical Interests

- I play ultimate frisbee year-round. (And, at one time, I played competitively.)
- I love baking. Mostly cookies.
